

Transaction costs and charges.

SERIES 8: This series applies to you if you are a member of the Social Care Institute for Excellent (SCIE) section of Atlas.

All trustees of Defined Contribution pension schemes like Atlas are required by law to provide certain information about investment costs and charges to members, as well as provide illustrations that should help members to better understand the effect of these charges over time.

The charges deducted by Atlas can also be found in members' Investment Guides.

The tables below set out the charges specific to the section of Atlas that you are a member of. There are different charges for each of the different investment options available to you.

Charges are categorised by the UK Government as follows:

Transaction Costs

The costs and charges incurred as a result of the buying, selling, lending or borrowing of investments.

These costs can vary over time, depending on the level of activity the manager undertakes. For example, we expect Schroders' transaction costs to be higher than those of our passive managers because the investment mandate we gave them requires them to actively manage the portfolio. There is more information on this in our value for money assessment which can be found in the Chair's Statement in Atlas' Report and Accounts, which you can find [here](#).

Charges

Referred to in the Investment Guide as the Annual Management Charge, these are categorised as the costs and charges that the members pay, other than **Transaction Costs** and those incurred as a result of the holding or maintenance of property.

For Atlas members, the Annual Management Charge is made up of two key component parts:

- An administration charge, covering things such as general record keeping, collecting and investing contributions, paying member benefits, providing Benefits Statements and producing statutory accounts.
- An investment charge, which is the amount we pay for investment services. This includes the charge we pay to Scottish Widows (who provide the administration platform which hosts all of our investments), and the charges levied by each of the underlying investment managers.

There is a third component – called the Additional Fund Expenses (AFE). These are estimates of additional expenses incurred in the management of the fund which are based on the recent history of such charges for the fund in question. Consequently they cannot be guaranteed – they may be more or less than the estimate. The combination of Administration charge, investment charge and AFE is referred to as the Total Expense Ratio, or TER. The TER is shown in the tables below.

Series 8

The tables below also show the Transaction Costs and Charges (TER) for each of the funds available to you. The first table shows the figures before charges have been taken into account, and the second table shows the effect of these charges over time. These are only illustrations and should not be taken as an indicator of how your fund will grow.

To try and make the illustrations more meaningful to you, we have used data from a similar section of Atlas and calculated the average age, contribution level and pension account value of all the active members. This is **Member A (Jos)**. We will update this calculation to include your section data in due course.

We have then adjusted this average to provide three alternative illustrations. The first (**Member B - Natalie**) is based on an active member who is 10 years younger than Jos, has half the average pension account value and who pays half the average level of contributions. The second (**Member C - Jofra**) is based on an active member who is 5 years older than Jos, has a pension account size which is 25% higher than him and whose contributions are 25% higher than his. And the third (**Member D - Anya**) is based on an active member who is 18 and has just joined Atlas; she has no previous pension account value.

We have also shown these different illustrations for deferred members (those who have left Atlas); these members (**Ben, Laura and Eoin**) no longer contribute into their pension account, but the same adjustments apply.

The columns that are highlighted show the investment period up until each member's 68th birthday, when we assume their contributions will stop and they will take their pension account. We have, however, shown both longer and shorter time lines so you can see the effect of charges over different time periods. No contributions are included beyond age 68.

Lastly – we have shown an example of the effect of drawdown on a member's pension account (**Member H - Nasser**). This is when your pension account remains invested with Atlas and you take (or 'draw down') a regular income. Remember that, with drawdown, your income isn't guaranteed for life – your money may run out before you die.

For this illustration we have assumed that Nasser has a pension account value (after taking his tax free cash) of £100,000. We have then assumed that Nasser draws down £4,000 each year in monthly instalments, and that he increases this rate of drawdown each year by 2.5% to help offset the effects of inflation.

Remember, these are intended only as guides. You can ask us for more information on your actual investments and others available to you by contacting the Atlas Administration team on 03451213389 or by email at memberenquiries@atlasmastertrust.co.uk. Alternatively, you can write to them at PO Box 555, Stead House, Darlington, DL1 9YT.

You can request paper copies of this costs and charges information, although the Trustee is not obliged to provide a hard copy if they have good reason to believe that you can access the information you require from the website.

You can also ask us for the International Securities Identification Number (ISIN) of the fund or funds in which you invest (or any that you are considering investing in). This is a unique reference number for each of the pooled investment funds available which will enable you to obtain more detailed information about these funds, including their objectives and past performance.

Notes for Jos' projected figures

- Projected pension pot values are shown in today's terms, and do not need to be reduced further for the effect of future inflation
- We have assumed that Jos has built up a pot of £6,000.00.
- He's currently 50 and in the first year (of the table above), he will contribute £5,000 into his pension account.
- His contributions will increase every year by 2.5% and he will stop contributing when he reaches age 68.
- Inflation (the increase in the cost of living) is assumed to increase each year at a rate of 2.5%.
- These costs and charges are based on the year to 31/03/2022.

Notes for Jos' projected figures

- Projected pension pot values are shown in today's terms, and do not need to be reduced further for the effect of future inflation.
- We have assumed that Jos has built up a pot of £6,000.00.
- He's currently 50 and in the first year (of the table above), he will contribute £5,000 into his pension account.
- His contributions will increase every year by 2.5% and he will stop contributing when he reaches age 68.
- Inflation (the increase in the cost of living) is assumed to increase each year at a rate of 2.5%.
- These costs and charges are based on the year to 31/03/2022.

Notes for Natalie's projected figures

- Projected pension pot values are shown in today's terms, and do not need to be reduced further for the effect of future inflation.
- We have assumed that Natalie has built up a pot of £3,000.00.
- She's currently 40 and in the first year (of the table above), she will contribute £2,500 into her pension account.
- Her contributions will increase every year by 2.5% and she will stop contributing when she reaches age 68.
- Inflation (the increase in the cost of living) is assumed to increase each year at a rate of 2.5%.
- These costs and charges are based on the year to 31/03/2022.

Notes for Natalie's projected figures

- Projected pension pot values are shown in today's terms, and do not need to be reduced further for the effect of future inflation.
- We have assumed that Natalie has built up a pot of £3,000.00.
- She's currently 40 and in the first year (of the table above), she will contribute £2,500 into her pension account.
- Her contributions will increase every year by 2.5% and she will stop contributing when she reaches age 68.
- Inflation (the increase in the cost of living) is assumed to increase each year at a rate of 2.5%.
- These costs and charges are based on the year to 31/03/2022.

Notes for Anya's projected figures

- Projected pension account values are shown in today's terms, and do not need to be reduced further for the effect of future inflation.
- We have assumed that Anya has not yet built up anything in her pension account.
- She's currently 18 and in the first year (of the table above), she will contribute £2,500 into her pension account.
- Her contributions will increase every year by 2.5% and she will stop contributing when she reaches age 68.
- Inflation (the increase in the cost of living) is assumed to increase each year at a rate of 2.5%.
- These costs and charges are based on the year to 31/03/2022.

Notes for Ben's projected figures

- Projected pension pot values are shown in today's terms, and do not need to be reduced further for the effect of future inflation.
- We have assumed that Ben is 45 and has built up a pot of £2,000.00.
- Inflation (the increase in the cost of living) is assumed to increase each year at a rate of 2.5%.
- These costs and charges are based on the year to 31/03/2022.

Notes for Ben's projected figures

- Projected pension pot values are shown in today's terms, and do not need to be reduced further for the effect of future inflation.
- We have assumed that Ben is 45 and has built up a pot of £2,000.00.
- Inflation (the increase in the cost of living) is assumed to increase each year at a rate of 2.5%.
- These costs and charges are based on the year to 31/03/2022.

Notes for Eoin's projected figures

- Projected pension pot values are shown in today's terms, and do not need to be reduced further for the effect of future inflation
- We have assumed that Eoin is 50 and has built up a pot of £2,500.00
- Inflation (the increase in the cost of living) is assumed to increase each year at a rate of 2.5%
- These costs and charges are based on the year to 31/03/2022

Notes for Eoin's projected figures

- Projected pension pot values are shown in today's terms, and do not need to be reduced further for the effect of future inflation
- We have assumed that Eoin is 50 and has built up a pot of £2,500.00
- Inflation (the increase in the cost of living) is assumed to increase each year at a rate of 2.5%
- These costs and charges are based on the year to 31/03/2022

DRAWDOWN EXAMPLE: Member H: Nasser

Projected pension account in today's money				Before Charges										
Member H: Nasser				Years (drawdown period)										
Fund	Total Expense Ratio	Transaction Costs	Assumed Investment Growth	1	3	5	10	15	20	25	30	31	32	50
Atlas Multi Asset Portfolio 3	0.350%	0.159%	3.45%	£96,963	£90,804	£84,531	£68,332	£51,368	£33,604	£15,001	-£4,481	-£8,486	-£12,529	-£92,048
Projected pension account in today's money				After all charges + costs deducted										
Member H: Nasser				Years (drawdown period)										
Fund	Total Expense Ratio	Transaction Costs	Assumed Investment Growth	1	3	5	10	15	20	25	27	28	29	30
Atlas Multi Asset Portfolio 3	0.350%	0.159%	2.94%	£96,475	£89,380	£82,224	£64,063	£45,508	£26,551	£7,182	-£683	-£4,640	-£8,615	-£12,607

Notes for Nasser's projected drawdown figures

- Projected pension account values are shown in today's terms, and do not need to be reduced further for the effect of future inflation.
- We have assumed that Nasser starts off with a pension account of £100,000
- He's currently 68 and we have assumed that he will take a drawdown income of £4,000 a year which increases in line with inflation.
- Inflation (the increase in the cost of living) is assumed to increase each year at a rate of 2.5%.
- These costs and charges are based on the year to 31/03/2022.
- You can see from the tables above that the drawdown income will run out when Nasser's pension account has reduced to zero. So, if we take into account all costs and charges deducted, this will be after 26 years of retirement – i.e. when Nasser is 94.
